

ABOUT

Aspiring AI & Data Science Engineer with expertise in Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, and Data Analytics. Skilled in Python and modern AI technologies, with experience developing intelligent solutions for real-world problems through data-driven innovation.

WORK EXPERIENCE

AI & Machine Learning Intern	2026
<i>Karpagam College of Engineering</i>	
- Worked on ML, DL, Computer Vision, and NLP projects using YOLO and LLMs - Built AI solutions using RAG and LangChain for intelligent automation - Used PostgreSQL, Snowflake, and Tableau for data processing and visualization - Deployed and managed workflows using Docker, Kafka, Roboflow, and n8n	
Smart India Hackathon (SIH) Participant	2025
<i>Karpagam College of Engineering</i>	
- Developed an Automated Waste Water Management System using IoT and ML - Built models to monitor water quality and optimize treatment processes - Collaborated in a team to design and present a working prototype solution	

EDUCATION

B.Tech, Artificial Intelligence & Data Science	2024 - 2026
<i>Karpagam College of Engineering</i>	
CGPA: 8.85, Relevant Courses: Data Structures, Algorithms, ML, Deep Learning, NLP	
Higher Secondary (12th) & SSLC (10th)	2022 - 2024
<i>Little Flower Matric Hr. Sec. School</i>	
12th: 94% 10th: 92%	

SKILLS

Languages	Python, Java, JavaScript, HTML, CSS
AI/ML Tech	Machine Learning, Deep Learning, NLP, Computer Vision, YOLO, Roboflow, LLMs, RAG, LangChain, Vector Databases
Data & DevOps	PostgreSQL, Snowflake, Tableau, Docker, Apache Kafka, n8n
Core CS	Data Structures, Design & Analysis of Algorithms, Web Development
Languages Spoken	English (Fluent), Tamil (Fluent)

PROJECTS

Cricket Analytics using YOLO
Built a YOLO-based system for real-time detection and tracking of players, bats, balls, and wickets, generating match insights via trajectory and player analysis.
Gen Farm - AI-Powered Smart Agriculture Platform
Built an AI smart-farming platform offering crop recommendations, weather analysis, and predictive insights using ML for data-driven farm management.
Smart Multi-Modal Journey Planner
Developed an AI urban mobility platform recommending efficient, cost-effective, eco-friendly routes using real-time traffic analysis and route optimization.
Neon Mini Arcade
Built a Python/Pygame arcade with five interactive games featuring animations, particle effects, score tracking, and power-ups.
Computer Vision (OpenCV)
Built a real-time webcam application using OpenCV for edge detection and image processing for object and pattern recognition.
