PROJECTS:

Mobile Product Recommendation System

Developed a machine learning-based recommendation system to suggest mobile products based on user preferences and browsing behaviour.

Online Shopper Intention Prediction

Built a machine learning model to predict customer purchase intention using online browsing data.

Applied classification algorithms and data analysis techniques to improve prediction accuracy and support business decision-making.

PROFILE

Highly motivated Computer Science student specializing in Artificial Intelligence and Data Science. Deeply interested in developing neural network architectures and natural language processing models. Experienced in implementing end-to-end ML pipelines through academic projects, with a strong foundation in statistical modeling and data preprocessing. Eager to apply theoretical knowledge to solve real-world industrial challenges.

WORK EXPERIENCE

Smart India Hackathon (SIH) Participant | Karpagam College of Engineering

2024 – 2025

Developed an Automated Waste Water Management System using IoT and Machine Learning to monitor water quality and optimize treatment processes.

Engineered predictive models to analyze chemical concentration levels, significantly improving the efficiency of filtration cycles.

Event Coordinator – Dhruva (College Function) | Karpagam College of Engineering

2025 – 2026

Managed the end-to-end execution and marketing for "Dhruva," the college's premier cultural/technical festival.

Strategized and optimized the marketing budget, ensuring maximum student participation through digital and offline channels.

EDUCATION

10th – Little Flower Matric Hr sec School with **92%**

12th – Little Flower Matric Hr sec School with **94%**

AIDS Student at Karpagam College of engineering and technology with a CGPA of **8.8**
